Message from the Chairperson

Diabetes does not wait.

It progresses quietly, damaging eyesight, kidneys, nerves, and livelihoods, especially when care is delayed. In Pakistan, one in four adults is living with diabetes. For many, diagnosis comes too late. For even more, treatment remains financially out of reach.

At the Dilawar Hussain Foundation (DHF), we witness both the consequences of delayed care and the transformation that becomes possible when support arrives in time.

In 2025, we treated over 86,000 patients across our centres. Ninety-five percent received free or subsidised care. Each of these patients represents a life stabilised before irreversible complications took hold.

But the need continues to grow.

Our mission is not simply to treat diabetes; it is to prevent its devastating consequences in families who cannot afford to manage it alone. Through early screening, continuous care, access to medicines, and patient education, we work to ensure that diabetes does not become a life sentence.

This year marked a significant milestone as DHF became a Full Member of the International Diabetes Federation. This recognition affirms our commitment to global standards and strengthens our ability to deliver high-quality, accountable care.

Yet recognition is not our destination. Impact is.

Behind every consultation and screening stands a dedicated team of medical professionals, educators, and support staff whose expertise and compassion turn our vision into daily action. Their work reflects our commitment to dignity, inclusion, and service.

As we look ahead, we do so with urgency and hope. The challenge is significant. But so is our collective ability to respond.

We invite you to stand with us to ensure that no one loses their health, independence, or dignity because care is out of reach.

Together, we can build a healthier future and **let's beat diabetes.**

Hassan Zubair Sheikh

Co-founder and Chairman of the Dilawar Hussain Foundation, Mr Sheikh has led the growth from a modest dispensary to three advanced diabetes centres. With over a decade of leadership experience, he also serves as an Executive Board Director at CCL Group.

Message from the Board

“At the Dilawar Hussain Foundation (DHF), we believe quality diabetes care should be accessible to all. We remove barriers through free and subsidised consultations, affordable medicines, and in-house laboratory services. With practical nutrition guidance and preventive foot care, we provide integrated support that ensures continuous, dignified, and affordable care for underserved communities.”

Dr Afshan Mir

Dr. Afshan Mir, a Lahore-based paediatrician, is Co-Founder and Executive Director of the Dilawar Hussain Foundation (DHF). She brings over 20 years of experience in non-profit healthcare and has held leadership roles in medical associations.

“Early screening and timely treatment help prevent long-term diabetes complications. Delays in achieving control increase the risk of neuropathy, retinopathy, and cardiovascular disease. At DHF, early detection and sustained management improve patients' quality of life and long-term health outcomes.”

Dr Abbas Raza

Dr. Syed Abbas Raza is President of the International Society of Endocrinology, a Consultant at Shaukat Khanum Hospital, and a DHF Board Member. He has received the Pakistan Endocrine Society's Lifetime Achievement Award, the Tamgha-i-Imtiaz, and the International Excellence in Endocrinology Award.

“At DHF, collaboration means building trust through collective effort. By working with medical professionals, community partners, and institutions such as the International Diabetes Federation, we raise credible awareness and deliver compassionate diabetes care to the communities that need it most.”

Amina Sheikh

Amina Sheikh, co-founder of the Dilawar Hussain Foundation (DHF), is a family business consultant and former Managing Partner for the Pakistan region of RTS Global Partners, a family business advisory firm based in the UAE.

Board Committees

The Board is supported by Budget & Finance, Resource Mobilisation and Operations Review Committees, along with a newly formed Ethics Committee to ensure strong oversight and accountability.

These committees help ensure transparent decisions and careful, responsible use of donor funds.

DHF in 2025

DHF was established in 2011 to address Pakistan's growing diabetes burden. From a single clinic, we have expanded to **three Diabetes Management Centres** in Ferozepur Road, Garhi Shahu and Kasur, providing **free or subsidised care** to urban and rural communities. Our services follow **standardised, evidence-based diabetes care in line with International Diabetes Federation (IDF) principles**, ensuring consistent quality across all centres. The **Kasur Centre now also offers dedicated ophthalmology services** for early detection and management of diabetes-related eye complications.

Pakistan now ranks **third globally** in diabetes prevalence, with **one in four adults** living with the condition and many more undiagnosed. DHF intervenes early through screening, education, continuous medical management and low-cost medicines to prevent complications and support long-term health.

To date, DHF has touched **more than 1.5 million lives**. In **2025 alone**, we treated **over 86,000 patients**, with **95%** receiving free or subsidised care. Our Centres offer consultations, nutritional counselling, diagnostic testing, footcare, wound management, ophthalmic support, medicines, and guidance from diabetes educators.

Beyond clinical work, DHF conducts free screening and awareness camps for underserved communities. In **November 2025**, **400+ individuals** were screened across **four locations**, with high-risk patients identified and counselled.

DHF maintains strong governance and full regulatory compliance. We are a **Full Member of the International Diabetes Federation (IDF)**, **PCP-certified**, **ISO 9001:2015 certified** and **Shariah-compliant**, with **87% of every rupee** spent directly on patient care.

As we grow, we continue to explore new models such as additional Centres, community education programmes, e-clinics and mobile units to expand access to affordable care.

“In 2025, DHF became a Full Member of the International Diabetes Federation, joining a global network representing over 170 national diabetes associations.”

33 Million Pakistani Adults Live with Diabetes

Diabetes in Pakistan: The Human Cost

For many families, diabetes is not just a diagnosis; it is a daily financial and health struggle.

1 in 4 adults in Pakistan is living with diabetes (25%)

A condition affecting work, mobility, and long-term wellbeing.

Pakistan ranks 3rd globally in diabetes prevalence

Among the highest diabetes burdens worldwide.

3 in 4 adults with diabetes live in low- and middle-income countries

Where access to affordable care remains limited.

Behind every number is someone trying to hold life together: a father pushing through fatigue to keep working, a mother worrying more about her children than her own rising sugar levels.

When treatment is delayed or out of reach, diabetes slowly takes its toll on eyesight, mobility, and a family's only source of income. But with steady, affordable care, these losses can be prevented.

“ Pakistan has over 34 million adults living with diabetes, yet affordable continuous care remains out of reach for many. ”

Who We Are

Our Mission & Why It Matters

Dilawar Hussain Foundation was founded on a simple belief: **diabetes should never become a life sentence because care is unaffordable.**

We envision a future where no one suffers from untreated diabetes, led by a centre of excellence that honours our legacy through **compassionate care, dedicated research, and a commitment to serve.**

Our mission is to provide **timely diagnosis, continuous treatment, and practical support** so patients can manage their condition with dignity.

Through dedicated diabetes management centres, DHF combines **clinical care, education, and prevention**, ensuring patients receive **ongoing support, medicines, diagnostics, and follow-up** — helping prevent complications before they begin.

As diabetes rises rapidly in Pakistan, delayed care leads to **preventable blindness, amputations, kidney disease, and loss of livelihood**. DHF focuses on **accessible, high-quality, continuous care** to make long-term disease management possible for underserved families.

“Through dedicated diabetes management centres, DHF combines clinical care, education and prevention, ensuring patients receive ongoing support, medicines, diagnostics and follow-up, helping prevent complications before they begin.”

Our Centres

Diabetes Management Centre, Ferozepur Road

This centre of excellence brings specialist consultations, diagnostics and follow-up care together in one place. Serving both affording and marginalised patients, mainly supported through subsidised care, the centre ensures patients are diagnosed early, treated on time and supported consistently to live healthier, more stable lives.

Diabetes Management Centre, Garhi Shahu, Lahore

Our Garhi Shahu Centre supports densely populated, low-income communities with consistent follow-ups, essential diagnostics and access to medicines. Through close community outreach and screening, it identifies high-risk individuals early and connects them to steady, long-term care.

Diabetes Management Centre, Kasur

Our Kasur Centre extends specialist diabetes care to surrounding towns and villages, closer to where families live. For many, it has reduced the need to travel long distances for treatment. Beyond clinical services, the centre strengthens local screening and referral networks, ensuring people get early diagnosis and continued care.

“24,000+ patient visits are served across DHF centres each month.”

Our Care Model

Medical Consultations

Specialist-led care by endocrinologists and diabetologists to improve glucose control and prevent complications.

Nutrition Support

Practical guidance on meal planning and healthy habits. Medical nutrition therapy can reduce HbA1c by 1–2%.

Foot Care Clinic

Early detection, wound care and prevention programmes — reducing amputation risk by up to 85%.

Diabetes Educator Support

Simple, practical education for patients and families on lifestyle, monitoring and self-care.

Pharmacy & Free Medications

Affordable access to essential medications, with free medicines for Zakat-eligible patients.

Ophthalmology Screenings

Regular eye exams to detect complications early — helping prevent up to 90% of diabetes-related blindness.

Lab Diagnostics

HbA1c, blood sugar and lipid testing to guide personalised treatment. Dedicated diagnostic lab planned for 2026.

Hepatitis B & C Screening

Free screening supporting early detection and improved overall health for patients living with diabetes.

Research

Strengthening our research focus to understand patient outcomes better.

Key Highlights

**PKR 37.9M in Medicines
Dispensed**

**88,018 Individuals
Received Care**

**254 Eye Care
Interventions**

**Saving sight
through early
retinal screening**

**85 Awareness
Sessions**

**Reaching 9,300
individuals,
supporting early
diabetes
management
awareness**

**2,468 Foot Care
Assessments**

**204 High-risk cases
treated**

**9,006 Diagnostic
Tests Conducted**

**Enabling early
detection**

**23,835 Patients Received
Nutrition Counselling**

**Strengthening long-term
diabetes management**

Roadmap for 2026 & Beyond

2026

- DHF diagnostic lab
- Collaborative centre in Kasur
- Multidisciplinary clinics

2027

- Medical care of 150,000 patients
- Research collaborations
- Education & lifestyle modification of 50,000 patients

2028

- New centre in South Punjab
- DHF lab: Two collection centres in Lahore, one in Kasur

2029

- Medical care of 200,000 patients
- A new centre of excellence

2030

- A new centre in Sindh
- Education & lifestyle modification of 100,000 patients

Research & Knowledge Development

Through clinical research and patient data, DHF continues to strengthen diabetes care in line with International Diabetes Federation standards.

Published Research

In 2025, DHF researchers published a study titled "Impact of Simplified Combination Therapy on Glycemic Control, Pill Burden, and Adherence in Type 2 Diabetes" in the Indus Journal of Bioscience Research.

The study examined how simplified oral combination therapy affects HbA1c control, medication burden and treatment adherence among patients with Type 2 diabetes in a real-world clinical setting. The findings support the value of treatment approaches that reduce pill burden while improving patient compliance and glycaemic outcomes.

Researchers:

- Dr. Hira Irfan
- Dr. Syed Abbas Raza
- Dr. Wasif Noor

Ongoing Study

DHF is currently conducting research on the impact of structured diabetes education on patients with uncontrolled Type 2 diabetes at our clinics.

This study is evaluating how patient education, counselling and lifestyle guidance influence blood sugar control and long-term disease management. The goal is to better understand how education can strengthen treatment outcomes and empower patients to manage their condition more effectively.

Ethics & Research Oversight

All research conducted at DHF is reviewed and approved by the DHF Ethics Committee, chaired by Dr. Afshan Mir, who ensures that studies follow ethical standards and protect the rights, safety and dignity of patients.

The committee reviews study protocols, consent procedures, risk-benefit considerations and data confidentiality before approving any research.

Prevention, Education & Community Outreach

Awareness & Education

DHF promotes early awareness and practical self-care through community sessions, centre-based talks, and digital outreach. Our clinical and nutrition teams guide patients and families on blood sugar control, diet, medication adherence, footcare, and healthy lifestyle practices.

DHF also supported capacity-building by facilitating training sessions for medical and nursing students.

Senior endocrinologists and nutritionists shared practical insights on diabetes prevention, clinical care, and nutrition, helping young professionals build early understanding of non-communicable diseases.

Diabetes Awareness Month

During Diabetes Awareness Month, DHF conducted education sessions across all Centres, led by clinical, diabetes education, and nutrition teams. Sessions focused on blood sugar control, diet, medication adherence, footcare, and early warning signs, encouraging patients and caregivers to adopt better daily management practices through talks, outreach, and digital guidance.

“Early lifestyle intervention can reduce the risk of type 2 diabetes by up to 50-60%. ”

Breast Cancer Awareness Month

During Breast Cancer Awareness Month, DHF conducted sessions on early detection, self-examination, and screening for women. In collaboration with Association of Fatima Jinnah Old Graduates (AFJOG), experts shared practical guidance on breast cancer and diabetes, with special focus on women at higher risk.

Women with diabetes have a higher risk of complications and poorer outcomes after a breast cancer diagnosis.

Hepatitis B & C Awareness and Screening

Through our ongoing hepatitis awareness and screening activities, patients were educated on the link between hepatitis and diabetes risk, prevention practices, and the importance of testing and vaccination. Regular screening support was provided through partner programmes.

“ Up to 80% of diabetes complications can be delayed or prevented with early detection and consistent self-management. ”

Community Outreach & Engagement

During **Diabetes Awareness Month (November 2025)**, DHF conducted free screening camps across four locations in Lahore and Kasur, including Fountain House, the Kasur Bar Council, and marginalised communities such as the Christian Colony.

More than **500 individuals** were screened, with high-risk cases identified for early intervention, testing and on-site counselling, ensuring timely support for those who might otherwise go undiagnosed.

“Over 500 individuals screened across Lahore and Kasur during Diabetes Awareness Month 2025”

Diabetes Awareness Walks

DHF organised Diabetes Awareness Walks in both Kasur and Lahore as part of World Diabetes Day activities in November.

In Kasur, the walk saw strong participation from the Kasur Bar Council, lawyers and court staff, highlighting engagement from a professional community that often places its own health last.

In Lahore, friends of DHF, families, collaborators and partners joined together to amplify awareness around early screening and long-term diabetes management. These walks helped turn a medical issue into a shared public conversation, reinforcing that diabetes is not just a clinical concern, but a collective responsibility.

Community-led Diabetes Awareness Walks held in Lahore and Kasur in November 2025

Townhall Sessions

In 2025, DHF hosted its first-ever town hall, creating a welcoming space for open conversation with employees. The session offered an opportunity to share DHF's approach to diabetes care, reflect on gaps in access, and build a shared understanding around prevention and long-term management.

“2025 marked DHF's first Town Hall, setting the tone for continued dialogue and engagement in the years ahead.”

Community Engagement Events

Beyond formal camps and walks, DHF extended outreach to marginalised and underserved communities, including Fountain House and the Christian community, where access to regular healthcare remains limited.

Across these engagements, over 220 individuals were screened, with all participants receiving clear explanations of their results and next steps. Medical and nutritional counselling helped address misconceptions around diabetes and encouraged timely follow-up.

These initiatives strengthened trust at the community level and reinforced DHF's commitment to inclusive, dignified care for all.

“ Targeted outreach brought screening and counselling to underserved communities often left out of formal healthcare ”

Our People

At DHF, care begins with people. Behind every consultation, screening and follow-up is a team committed to delivering compassionate, consistent diabetes care where it is needed most.

Our multidisciplinary staff includes diabetologists, endocrinologists, ophthalmologists, nutritionists, diabetes educators, nurses, pharmacists, laboratory and outreach teams, supported by dedicated operations and administrative staff. Together, they ensure that patients receive not only treatment, but understanding, guidance and long-term support.

Working closely with patients and families, our teams focus on education, prevention and continuity of care, helping individuals manage diabetes with confidence and dignity. As DHF continues to grow, our people remain the foundation of our impact, showing up every day with skill, care and quiet commitment.

The Amputation That Never Happened

It began with a small wound.

For months, Imrana Khan, a senior announcer at Radio Pakistan, did not realise how serious it had become. Living with diabetes, what seemed minor slowly turned into a dangerous infection. By the time she sought help, doctors warned that amputation might be the only way to stop it.

Alarmed, her husband brought her to the Dilawar Hussain Foundation.

Our team began urgent diabetic foot care, cleaning the wound, controlling the infection, and monitoring her recovery day by day. Slowly, the infection began to retreat. The wound started to heal.

The amputation she had been warned about never came. Her foot was saved.

For patients like Imrana, timely care is the difference between disability and dignity. With the right treatment, even the most frightening complications of diabetes can still be prevented.

Voices of Impact

At DHF, we do not treat one patient; we stand with a whole family.

Diabetes changes everything. One diagnosis can quietly reshape an entire household. When a patient learns how to manage their condition, the fear begins to lift. Meals change. Medicines are taken on time. Families understand. Care becomes shared.

And when a family regains control, hope returns, not just for one person, but for everyone at the table.

PAKEEZA

At just six, Pakeeza should be worrying about school and play, not insulin and blood sugar. In a home already stretched thin, diabetes became another daily burden. With steady care and proper nutrition from DHF, she is slowly gaining strength. Your support does not just treat her condition, it gives a child her childhood back.

SHAMA

“For years, I lived in fear, not just of diabetes, but of being turned away because I am a transgender person. Finding care felt harder than managing the disease itself. At DHF, I was treated with respect. I was heard. I was cared for. Today, my sugar levels are under control. For the first time, I believe my future is not defined by fear – but by hope. DHF made that possible.”

SALEHA

“Four years ago, I was choosing between medicine and daily expenses. Treatment felt out of reach, and my health was slipping. DHF stood by me when I had nowhere else to turn. Today, I am stable. I contribute towards my care. I live with dignity, not fear. DHF gave me the chance to stand on my own again.”

Impact That Changes Lives

Behind every number is a patient receiving care, managing diabetes with confidence, and protecting their future.

1.5M+

Lives touched through sustained diabetes care since 2011

4,000

Average monthly patient visits across DHF centres.

95%

Patients receiving free or subsidised treatment.

9,006

Diagnostic lab tests guiding accurate treatment and monitoring.

254

Eye examinations enabling early detection of vision complications.

35%

Patients returning regularly for follow-up care.

58%

Patients showing improved HbA1c and better glucose control.

20

Amputations prevented through timely intervention and specialised care.

Partnerships, Standards & Global Recognition

Corporate & Institutional Partnerships

In 2025, DHF continued to grow through partnerships built on shared values and mutual trust. We worked closely with corporations and foundations who recognise that meaningful change in diabetes care takes time, consistency and care. Their support helped us strengthen prevention, expand awareness efforts and deliver sustained care to communities that need it most. We remain deeply thankful to our partners for walking this journey with us and helping make compassionate, accessible healthcare a reality for thousands of families.

HBL
FOUNDATION

Quality Standards & Compliance

At DHF, we know that trust matters. Our work is built on clear systems, strong oversight and a deep sense of responsibility towards our donors and the families we serve.

We are a registered non-profit organisation under **Section 2(36) of the Income Tax Ordinance, 2001**, and are **certified by the Pakistan Centre for Philanthropy (PCP)**. DHF is **Shariah-compliant**, with certification from **Jamia Naemia, Lahore**, and we maintain **separate Zakat and Charity accounts** to ensure funds are used as intended. Our operations are also **ISO 9001:2015 certified**, and we are duly registered and governed under the **Joint Stock Companies Act of 1860**.

These standards help ensure that every contribution is handled with care, transparency and respect — and that support reaches those who need it most.

IDF Full Membership

Dr Afshan Mir, Executive Director, Dilawar Hussain Foundation (Left), with Dr Niti Pall, President-Elect, International Diabetes Federation (Right)

In 2025, DHF became a Full Member of the International Diabetes Federation (IDF), with 97% approval in the membership vote. This global recognition places **DHF among only four fully recognised IDF members in Pakistan, and the only one in Punjab.**

This milestone affirms that **our governance and care meet recognised international standards.** We are implementing **IDF-aligned protocols across our centres in Lahore and Kasur,** strengthening prevention, improving clinical quality, and ensuring patients receive care **in line with global benchmarks.**

Most importantly, **IDF membership connects DHF to a worldwide network of expertise,** enabling us to **bring global best practices home to the communities we serve.**

“ **IDF standards of diabetes care are now being implemented across our centres in Lahore and Kasur.** ”

AUDIT REPORT:

AMIN, MUDASSAR & CO. Chartered Accountants

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS

OPINION

We have audited the annexed financial statements of **Dilawar Hussain Foundation**, which comprise the statement of financial position as at June 30, 2025, the income and expenditure account, statement of changes in Funds and Reserves, the statement of cash flows for the year then ended and notes to the financial statements, including material accounting policy information.

In our opinion, the annexed financial statements present fairly, in all material respects, the financial position of **Dilawar Hussain Foundation** as at June 30, 2025 and its financial performance and its cashflows for the year then ended in accordance with approved accounting and reporting standards as applicable in Pakistan.

Basis for Opinion

We conducted our audit in accordance with the International Standards on auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Foundation in accordance with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the Code), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance For The Financial Statements

The Management Committee is responsible for the preparation and fair presentation of the financial statements in accordance with the approved accounting and reporting standards as applicable in Pakistan, and for such internal control as the Management Committee determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management Committee is responsible for assessing the Foundation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Foundation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Foundation's financial reporting process.

Auditor's Responsibilities For The Audit of The Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

How You Can Support Us

Volunteer

Give your time and skills to help families facing diabetes feel supported, informed, and less alone.

Friends of DHF

Help us reach more people who are silently struggling with diabetes. Your voice can connect someone to life-saving care.

Sponsor a Patient

For PKR 15,000 per month, you can help prevent blindness, kidney failure, amputation, and loss of livelihood for one person living with diabetes.

Support a Screening Camp

For PKR 115,000, you can enable early detection for hundreds of people, preventing complications before they begin.

Donate

Your contribution helps ensure that no one is forced to choose between food and life-saving treatment.

Ways to Get Involved

Every contribution helps someone access the care they deserve.

Main Ferozpur Road, Near Sethi Motors, Lahore.

Make an impact now.

Moving Forward with Purpose

Across our communities, thousands of people living with diabetes are still forced to choose between life-saving treatment and basic survival. Without timely care, preventable complications can take away health, independence, and livelihood.

At the Dilawar Hussain Foundation, we believe no one should face this journey alone. With your support, we can reach more patients, provide continuous care, and prevent complications before they change lives forever.

Every contribution turns into medicines delivered, families supported, and futures protected.

“Stand with us. Help ensure that diabetes care remains accessible, compassionate, and dignified for those who need it most. Together, we can change the story of diabetes in our communities.”
